

TAKSH PANCHAL

Flutter Developer | Mobile & Cross-Platform Engineer | iOS (Swift) | DevOps

Vadodara, India | +91 7600894822 | taksh2595@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Flutter Developer with 2+ years of experience designing and shipping production-grade mobile, web, and cross-platform applications. Proven track record building scalable apps with Flutter, Dart, Firebase, and PocketBase, using Bloc, GetX, Provider, and Riverpod for state management. Skilled in REST APIs, WebSockets, CI/CD pipelines (GitHub Actions), and Docker-based DevOps workflows, with hands-on iOS development experience in Swift and SwiftUI. Independently built, published, and monetized FuelShift on the Apple App Store, alongside commercial UI source-code products and Flutter/Dart educational eBooks. Adept at owning the full product lifecycle — from architecture and UI/UX to deployment — for startups, enterprises, and freelance clients.

EXPERIENCE

Flutter Developer | Invennico TechnoLabs

2024 – April 2026 | Vadodara, India

Completed full tenure; left the organization in April 2026 to focus on independent product development.

- Built and maintained scalable mobile applications using Flutter & Dart for production clients.
- Integrated REST APIs, WebSockets, and real-time features in collaboration with backend teams.
- Implemented CI/CD pipelines with GitHub Actions, automating builds and reducing release turnaround.
- Used Docker to standardize development and deployment environments across the team.
- Improved application performance through optimization and state management (Bloc, Provider).
- Participated in code reviews, sprint planning, and agile development processes.

Software Developer Intern | BooleanWorld

01/2024 – 06/2024 | Vadodara, India

- Developed a complete full-stack inventory management application using Flutter & Dart.
- Implemented responsive UI for both desktop and mobile form factors.
- Conducted testing, debugging, and performance optimization for production readiness.
- Delivered a secure, scalable solution adopted for real-world business use.

FEATURED PRODUCT

FuelShift — Vehicle Expense & Fuel Tracking App — Independent Product, Published on Apple App Store

fuel-mind.web.app

- Built and launched FuelShift independently end-to-end, from concept to App Store release.
- Developed with Flutter and Firebase, covering fuel tracking, mileage analytics, maintenance tracking, reminders, PDF reporting, and expense insights.
- Integrated subscription-based monetization to drive recurring revenue.
- Owned complete UI/UX design and product architecture decisions.
- Managed the full App Store deployment and release process independently.

DIGITAL PRODUCTS & ENTREPRENEURSHIP

UI App Source Code Product — Commercial Flutter Template, Published on Gumroad

takshfire.gumroad.com

- Designed and developed a complete Flutter UI application as a commercial source-code product.
- Built reusable components, responsive layouts, and animations on a scalable architecture.
- Published and actively sold to developers as ready-to-use, production-grade source code.

TECHNICAL AUTHOR & CONTENT CREATOR

- Authored and published Flutter and Dart educational eBooks for mobile developers.
- Created practical, problem-solving focused programming resources for the developer community.
- Built and distributed educational digital products covering Flutter learning paths and coding problems.

PROJECTS

E-Commerce Mobile Application (Freelance) — Flutter, Firebase, Stripe/Razorpay · 2025

- Designed and developed a full-featured e-commerce app with authentication, listings, cart, and checkout.
- Integrated Razorpay/Stripe payments, push notifications, and admin dashboard APIs.
- Implemented product search with filters and used Firebase for auth, database, and analytics.

Inventory Management System — *Flutter, Dart · 2024*

- Built product management, inventory control, and sales/purchase transaction logging.
- Implemented barcode generation for streamlined product identification and tracking.
- Delivered a real-world, business-ready inventory tracking solution.

Portfolio Website — *Flutter Web · 2024*

takshpanchalportfolio.buzz

- Developed a fully responsive personal portfolio using Flutter Web to showcase skills and projects.
- Implemented a clean, modern design optimized across devices and browsers.

Corporate Websites — **SoorBodh & JTCBRD** — *Flutter Web · 2024*

- Developed and deployed responsive company websites using Flutter Web with optimized performance.
- Delivered live production builds for client businesses.

TECHNICAL SKILLS

- **Mobile Development:** Flutter, Dart, Swift, SwiftUI
- **State Management:** Bloc, GetX, Provider, Riverpod
- **Backend & APIs:** Firebase, PocketBase, REST APIs, WebSockets
- **Database:** Hive, SQLite, Drift, Firebase Firestore
- **DevOps & Tools:** Git, GitHub, GitHub Actions, Docker, CI/CD
- **Payments & Monetization:** Stripe, RevenueCat, In-App Purchases
- **Deployment:** Play Store, App Store Connect, Firebase Hosting

EDUCATION

B.E. in Information Technology

Sardar Vallabhbhai Patel Institute of Technology, Vasad

2020 – 2024
